

NAGF Activities

The NAGF is actively engaged in a number of tactical and strategic activities with FERC and NERC which provide the opportunity to convey the technical capabilities, technical constraints, and economic impacts of Reliability Standards and proposed regulatory changes on the generator sector:

NAGF Representation and Participation

- NERC Board of Trustees Meetings
- NERC Standards Committee (SC)
- NERC Compliance and Certification Committee (CCC)
- NERC Planning and Operating Committees (PC/OC)
- NERC Resources and Event Analysis Subcommittees (RS/EAS)
- NERC Essential Reliability Services Working Group (ERSWG)
- NERC Trades Association Conference Calls
- Primary Frequency Response (PFR) Workshop

Policy Influence

- FERC Notices of Inquiry
- Notices of Proposed Rulemaking (NOPR)
- NERC BOT Requests
- NERC SDT
- Compliance Guidance submittals

NAGF Working Groups

- Lessons Learned
- Peer Review
- Security Practices / CIP
- Standards Review Team
- Training
- Variable Resources

NORTH AMERICAN GENERATOR FORUM

Who We Are

The North American Generator Forum is an independent, member-driven organization whose collective knowledge and expertise in the generation sector is recognized by FERC, NERC, and the electric utility industry. Through open source collaboration and information exchange with generator industry professionals, the NAGF provides a unified voice to NERC with the goal of improving the reliability, resiliency, and security of the bulk electric system.

Why Your Company Should Belong

At a time when generators are looking to economize, the NAGF provides a network of industry compliance, operations, and equipment technical experts to assist the reliability efforts of individual generators. Challenging compliance issues are unlikely to be unique and the NAGF provides companies with multiple information resources on how others address similar issues. In addition, the NAGF provides strength in numbers and therefore significant influence when commenting to FERC and NERC on reliability standards, initiatives, and rule making.

Membership

NAGF membership is open to all generator owners and/or operators in North America.

For more information on NAGF membership and benefits, please contact Wayne Sipperly, NAGF Executive Coordinator at 914.806.0397 or email wsipperly@generatorforum.org.
