- **NERC Reliability Guideline: Generating Unit Winter Weather Readiness – Current Industry Practices – Version 3**

The Reliability and Security Technical Committee (RSTC) recently approved the subject document for posting. The focus of this guideline is on maintaining individual unit reliability and preventing future cold weather related events. This document provides a general framework for developing an effective winter weather readiness program for generating units throughout North America.

- **NERC 2021 RISC Reliability Leadership Summit – Registration open**

The Reliability Leadership Summit, hosted by NERC and the Reliability Issues Steering Committee will be held January 26 & 27, 2021 01:00-05:00 pm Eastern. The summit will focus on four specific areas: Grid Transformation and Extreme Natural Events on Day 1 and Security Risks and Critical Infrastructure Interdependencies on Day 2, with each panel hosting an impressive array of expert panelists. The summit will be conducted Via Teleconference/WebEx.
